Match the words with their definitions

To make something known	To say what is likely to happen
Important or meaningful	To prove or create something
To evaluate or judge	To disagree with or oppose
To gain or obtain	To explain the meaning of something
To discover or establish something	To accept something as true without proof
To improve or increase	To be greater than

	Word	Meaning
1	Exceed	
2	Acquire	
3	Assess	
4	Assume	
5	Contradict	
6	Determine	
7	Establish	
8	Enhance	
9	Interpret	
10	Predict	
11	Reveal	
12	Substantial	

Exercise 2-Complete the sentences

assess	contradict	enhance	predict	reveal	interpret
exceed	acquire	determine	assume	establish	substantial

Complete the following sentences using the words from the box. Use each word only once
1. Scientists need to _____ the environmental impact of industrial activities.
2. The temperature must not _____ 100°C during the experiment.
3. University students should _____ practical skills through laboratory work.
4. Researchers cannot simply _____ that their hypothesis is correct.
5. The new findings seem to _____ the results of previous studies.
6. Scientists conducted several tests to _____ the chemical composition of the substance.
7. The experiment helped researchers _____ a relationship between temperature and pressure.
8. Modern technologies can _____ the quality of scientific research.
9. Students must learn how to _____ graphs and statistical data.
10. Scientists use mathematical models to _____ future climate changes.
11. The latest experiment may _____ unexpected results.
12. The research has made a _____ contribution to the development of medical science.

Exercise 3 - Choose the correct word

Circle the correct answer

1. The researchers wanted to (assess/assume) the effectiveness of the new treatment.
2. The results (contradict/acquire) the initial hypothesis.
3. Students (acquire/exceed) knowledge through practical experiments
4. The scientist used a special technique to (determine/interpret) the exact temperature
5. New technologies can (enhance/reveal) the accuracy of scientific measurements
6. The researchers could (predict/establish) a connection between pollution and climate change
7. The study (revealed/assumed) several important environmental problems.
8. The experiment produced a (substantial/contradictory) improvement in the quality of water

Exercise 4 - Find the synonyms

Match each word with its closest synonym.

Word	Synonym
1. Acquire	A. Forecast
2. Assess	B. Improve
3. Determine	C. Obtain
4. Enhance	D. Significant
5. Predict	E. Evaluate
6. Reveal	F. Establish
7. Substantial	G. Disclose
8. Contradict	H. Oppose

Exercise 5 - Complete the scientific paragraph

Fill in the blanks using the words in the box.

predict - substantial - determine - interpret - acquire - enhance - reveal - assess

Scientific research plays an important role in the development of modern society. Through laboratory experiments, students and researchers _____ practical knowledge and experiences. They use different methods to _____ the quality of materials and _____ their chemical properties. Advanced equipment helps scientists _____ the accuracy of their measurements and obtain more reliable results. Researchers also analyse experimental data to _____ possible changes in environmental conditions. However, they must carefully _____ the results before drawing conclusions. Scientific investigations may _____ unexpected information about natural processes and make a _____ contribution to technological.

Exercise 6 - Correct the mistakes

Each sentence contains an incorrect use of one of the target vocabulary words. Replace the incorrect word with the appropriate one.

1. Scientists need to predict the quality of a research project before evaluating it.
2. The students established new vocabulary by reading scientific articles
3. The experiment exceeded that the initial hypothesis was correct
4. Modern technology can acquire the quality of laboratory results
5. Researchers interpreted the exact amount of oxygen using special equipment.
6. The results revealed the previous scientific theory
7. Scientists assumed the relationship between the two variables through experimental tests.
8. The study made a very substantial improvement in the researchers' understanding of the problem.

Exercise 7-Complete the sentences with your own ideas

Use the target vocabulary to complete the following sentences meaningfully

1. Scientific research can enhance _____.
2. If the temperature exceeds _____ , the experiment _____ .
3. Researchers need to assess _____ .
4 Students can acquire scientific knowledge by _____ .
5. New scientific discoveries may contradict _____ .
6. Scientists use statistical methods to determine _____ .
7. Future environmental problems can be predicted by _____ .
8 A substantial improvement in science requires _____ .

Exercise 8 - Reading comprehension

Read the text and answer the questions

Scientific Research and Environmental Challenges

Scientific research plays a substantial role in understanding environmental challenges Researchers assess the quality of water, air and soil to determine the level of pollution in different regions. Their findings sometimes contradict previous assumptions about the causes of environmental problems.

By using advanced technologies, scientists can acquire accurate information and enhance the quality of their investigations. These technologies also help researchers interpret complex data and predict possible environmental changes

Recent studies have revealed that industrial activities may significantly affect natural ecosystems. Scientists therefore need to establish effective strategies to reduce pollution and prevent environmental deterioration

Questions

1. What is the role of scientific research in understanding environmental challenges?

2. What do researchers assess to determine pollution levels?

3. Why might new scientific findings contradict previous assumptions?

4. How can advanced technologies enhance scientific investigations?

5. What have recent studies revealed about industrial activities?

6. Find words in the text that mean:

   a. To obtain:
   b. To forecast
   c. To evaluate:
   d. To make something known:

Exercise 9 - Speaking: Scientific discussion

Work in pairs. Discuss the following questions. Use at least five vocabulary words in your answers.

1 How can scientific research enhance the quality of life in Morocco?
2 Can scientists accurately predict climate change?
3. How can university students acquire more practical scientific knowledge?
4. Why is it important to assess the reliability of scientific results?
5. Can new discoveries contradict established scientific theories?

Part 2 - Reading

Read the text once for the main idea. Then read it again and do the exercises

A Day in Sara's Life

Sara is a university student. She is twenty years old and she studies Biology. On weekdays,she always wakes up at 6:30 in the morning. She gets up at 6:45, takes a shower and gets dressed. She usually has breakfast with her sister at 7:15. She often has bread, olive oil and tea.

Sare goes to university by bus. Her classes start at 8:30 and finish at 3.00 in the afternoon on Monday, Tuesday and Thursday. On Wednesday she only has classes in the morning. She has lunch in the cafeteria at 12:30 with her friends. After lunch she sometimes studies in the library.

At 4:30 Sara goes home. She does her homework and helps her mother cook dinner. They have dinner at 8:00. Sara never watches TV before she finishes her homework. She usually goes to bed at 11:00 pm

At the weekend, Sara's routine is different. She never wakes up early on Saturday! She sleeps until 9:00 and then she meets her friends. On Sunday, she sometimes works as a volunteer at the library, but she always calls her grandmother in the evening

Tip: underline the verbs in one colour and the adverbs of frequency in another

Exercise 5 . True or false?

Write T (true) or F (false). Correct the false sentences.
1. Sara studies Biology. ___
2. Sara wakes up at 7:15 on weekdays. ___
3. She goes to university by car.___
4. She has lunch with her friends.___
5. On Wednesday she has classes in the afternoon.___
6. Sara always watches TV before she does her homework.___
7. On Saturday Sara wakes up early.___
8. On Sunday she calls her grandmother in the evening.___

Exercise 6 - Choose the best answer
Circle a, b, or c
1. What time do Sara's classes start? a) 7:15 b) 08:30 c) 9:00
2. Who does Sara have breakfast with? a) her sister b) her mother c) her friends
3. Where does Sara have lunch? a) at home b) in the library c) in the cafeteria
4. What time does Sara usually go to bed? a) 10:00 pm b)11:00 pm c) midnight
5. Who does Sara help in the evening? a) her mother b) her sister c) her grandmother
6. What does Sara sometimes do on Sunday? a) she sleeps until 9.00 b) she works as a volunteer c) she has classes

Exercise 7 - Put Sara's day in order

Write the numbers 1 to 8 in the boxes

[ ] She does her homework
[ ] Sara wakes up
[ ] She goes to bed.
[ ] She has lunch in the cafeteria
[ ] She takes a shower.
[ ] They have dinner
[ ] She goes to university
[ ] She has breakfast

Exercise 8 - Find the word in the text

1. a person who studies at university _____.
2. a place with many books where you can study _____.
3. Monday to Friday _____ .
4. Saturday and Sunday _____.
5. a person who works without pay to help others _____.

Exercise 9 - Answer in full sentences

1. What does Sara do on Wednesday?
   _____ .
2. What does she often have for breakfast?
   _____ .
3. What does Sara do at the weekend?
   _____ .
4. How is your day different from Sara's?
   _____ .

Part 4 - Speaking

Task: speak about your daily routine for one minute. Then tell the class about your partner

Useful phrases

First,... Then,... After that,... After classes,... In the evening,... At the weekend,...
On Saturdays,... What about you? Really? Me too

Build your script
Complete the notes about your day Use a different adverb of frequency in each sentence where you can

1. On weekdays, I _____ wake up at _____ .
2. I _____ have _____ for breakfast.
3. I go to university _____ .
4. My classes start at _____ and finish at _____ .
5. I _____ have lunch _____ .
6. After classes, I _____.
7. In the evening, I _____ .
8. I _____ watch TV before I finish my homework
9. I go to bed at _____.
10. At the weekend, I _____.

Interview three partners

Ask: What time do you wake up? What do you have for breakfast? What time do you go to bed?
White short notes

Name	Wakes up at	Has for breakfast	Goes to bed at

Part 5 - Writing

Task: write an email to a pen friend about your daily routine. Write 80 to 120 words.

Say what time you do things, on which days, and how often. You can start from your speaking script.

Useful: Hi …, Thanks for your email. On weekdays, I … At the weekend, I …
What about you? Write soon,

Check your email

- ☐ 80 to 120 words
- ☐ At least 3 different adverbs of frequency
- ☐ At least 4 times, for example 7:30 or 8 o'clock
- ☐ A day or weekend word, for example Monday or weekend.
- ☐ At least 2 linking phrases, for example in the evening or after classes
- ☐ Every he, she or it verb has-s or-es
- ☐ The adverb is before the main verb and after am, is or are.
- ☐ I used at with times, on with days and in with the morning, afternoon and evening
- ☐ Every sentence starts with a capital letter and ends with a full stop
